Insider Tips and Secrets to Get The MOST Out of Your Computer

JUNE 2012— VOL 7 — ISSUE 6

## FREE eBook:

### “What Every Business Owner MUST Know To Protect Against Online Identity Theft”

All it takes is one innocent security slip by you or one of your employees to instantly give online criminals the information they need to access your network and steal your identity. In no time at all, they can gain enough information to max out your credit cards, wipe out your bank accounts, and completely obliterate your business and personal credit. They can even use your identity to commit further crimes such as forgery, stealing from other businesses, or online scams. This nightmare can take months - sometimes years - to clean up and can destroy your credit and good name.

- The 3 most effective tricks online identity thieves use to gain access to your business and personal information - and how to avoid them.
- Sneaky e-mails you should delete IMMEDIATELY upon receiving them (you'll want to share this list with your friends, family and staff).
- One super-easy, sure-fire way to make your computer network impervious to online identity thieves.
- How to protect yourself against NEW scams being spread through social media sites like Facebook or Twitter.
- How to keep your employees from accidentally giving away passwords and other “keys to the kingdom” to Internet criminals.
- To download your free copy, go to the web site below. Copies of this eBook will be made available for FREE until June 30, 2012.
